

Activity Day at the Submarine Force Museum

Join us on August 3 as we celebrate the 51st anniversary of USS *Nautilus*'s arrival at the North Pole with a day of fun-filled activities!

*Help draw a map of *Nautilus*'s North Pole adventure using sidewalk chalk—and then travel the boat's route on foot! (Keep your fingers crossed for good weather!)

*Send a message the Navy way! Ask and answer questions using signal flags, Morse Code, and periscopes!

*Build with "ice cubes," take a break with some submarine stories, or—back by popular demand—design a LEGO sub!

*Create your own periscope to take home!

*Go on a scavenger hunt as you tour the museum—there's a prize if you finish!

Activities will be available between 10 AM and 3 PM—check the bulletin board when you arrive for specific times and locations, as well as sign-up sheets!

It's our last activity day of the
summer, so we hope we'll see you
there!
